

The Academy of Veterinary Clinical Pathology Technicians

Case Log Candidate Information

Candidates will use the case log form provided in the candidate application packet. Individual patients may be used for multiple case log entries if several tests are requested. AVCPT recommends all candidates submit more than the minimum required number of case log entries. If any entries are not accepted the applicant may not meet the minimum number needed for the application.

Species Requirements:

If the candidate is employed in a multi-species facility, case log entries must be submitted from at least two species categories. If the candidate is employed in a single-species facility, 90% of all case log entries specific to that single species may be submitted. The remaining 10% of case log entries must be from one or more additional species categories.

Example: Employer – Sunnyville Cat Hospital

It would be permissible to submit 90% of case log entries from cats, but the candidate must also include 10% of case log entries from **at least** one additional species.

Required Case Log Counts:

50 (no more than 75) CBCs

25 (no more than 40) Chemistries

25 (no more than 40) Urinalysis

25 (no more than 40) Includes cases from the following testing categories GROUP A:

- Coagulation
- Cytology
- Additional Hematology
- Immuno-Hematology

25 (no more than 40) Includes cases from the following testing categories GROUP B:

- Microbiology
- Parasitology
- Coprology

20 (no more than 30) Includes cases from the following testing categories GROUP C:

- Acid-base evaluations
- Serology
- Immunology
- Toxicology
- Other tests
